

NO ON V

PROTECT TEACHER HOUSING

We live in one of the most expensive places in the country. Teachers can't afford to live here and our schools are understaffed as a result. We need solutions that support teacher housing, not obstruct it.

That's why we must defeat Measure V.

Measure V stops a plan for 90 affordable homes for teachers and working families on the lot formerly occupied by the James Flood Magnet School. It's a bad policy and a dangerous precedent.

VOTE NO ON V – A VERY BAD IDEA

Blocks affordable housing for teachers and working families

Could violate state and federal housing law, costing Menlo Park taxpayers millions in legal fees

Racially and economically segregates our community, according to an independent study recently commissioned by the City

Bad policy with no expiration date

NO ON V
PROTECT TEACHER HOUSING

MEASURE V:

**Bad for Teachers, Bad for Taxpayers,
Bad for Menlo Park**

- X** Measure V will stop 90 affordable homes from being built for teachers and working families
- X** Measure V will be nearly impossible to overturn if enacted and will lock in a fatally flawed policy forever
- X** Measure V will make housing access unequal and unfair and further segregate our community
- X** Measure V will prevent local schools from receiving millions in locally controlled funding that would result from the new housing

WE ALL AGREE: NO ON V
